

Tarun M

Aspiring Network Engineer | Linux & Infrastructure

Email: tarunmr2005@gmail.com | Phone: +91-9566293397

LinkedIn: linkedin.com/in/tarun-murali | Portfolio: www.tarun-murali.me

Professional Summary

Computer Science and Engineering student focused on Linux systems and computer networking, with hands-on lab experience in Linux administration, TCP/IP troubleshooting, network monitoring, and security hardening. Comfortable with Linux CLI, Bash, SSH, systemd, logs, Wireshark, tcpdump, Nmap, and Python scripting for infrastructure tasks. Foundational exposure to cloud platforms, cybersecurity, and AI-assisted development, with a strong interest in enterprise networking, infrastructure support, troubleshooting, and reliable IT operations.

Education

Bachelor of Engineering in Computer Science and Engineering

Nov 2022 – June 2026

Agni College of Technology, Chennai | CGPA: 8.18

Technical Skills

Linux / Systems: Linux (CLI), Ubuntu/Debian, Bash, SSH, systemd, users/permissions, process and service management, log analysis, package management, Proxmox, cron, basic server hardening.

Networking: TCP/IP, OSI model, IPv4/IPv6 basics, subnetting, VLANs, routing, DHCP, DNS, NAT, SSH, network troubleshooting, Wireshark, tcpdump, Nmap, Cisco Packet Tracer, GNS3.

Programming / Automation: Python, Bash scripting, C (basic).

Cloud / Cybersecurity: AWS fundamentals (EC2, VPC, IAM), network security, vulnerability assessment, IDS/SIEM concepts, Splunk (basic).

AI Tools: GUI and CLI-based AI tools, agentic coding tools, Hermes, OpenClaw, LM Studio, Ollama, llama.cpp, AI-assisted development, local LLM deployment and inference.

Development Tools: Git/GitHub, VirtualBox, Linux networking utilities.

Projects

Linux Server Monitoring & Hardening Lab

Configured Linux virtual machines for service administration and troubleshooting; practiced user and permission management, SSH access, firewall rules, package updates, systemd services, log analysis, scheduled jobs, and basic host hardening.

Enterprise Network Troubleshooting Lab

Built routed and switched topologies in Packet Tracer/GNS3 covering subnetting, VLANs, inter-VLAN routing, DHCP, DNS, NAT, and SSH; used Wireshark, tcpdump, ping, and traceroute to isolate connectivity and configuration issues.

Python Infrastructure Health-Check Automation

Developed Python scripts to check host reachability and service availability, inspect CPU/memory/disk usage, parse Linux logs, and generate simple status reports for repeatable infrastructure monitoring.

Experience

Product Development / Flutter Developer Intern

Apr 2025 – Oct 2025

Graspear Solutions Pvt. Ltd., Chennai

- Developed and maintained production mobile applications using Flutter, including hardware-integrated features and data-rich dashboards.
- Worked across development, debugging, device integration, and feature delivery in a professional team environment.

Certifications & Professional Development

- Certified Network Security Practitioner (CNSP) – The SecOps Group
- NPTEL Cloud Computing – Elite + Silver; Score: 78%
- Google Cybersecurity Professional Certificate – completed all 8 courses
- Networking Basics – Cisco Networking Academy
- Cisco CCNA – Currently Preparing

Strengths

Strong interest in network infrastructure and Linux systems, with a practical approach to systematic troubleshooting and root-cause analysis. Comfortable working independently as well as in team environments, with good communication, adaptability, attention to detail, and a willingness to learn new technologies. Interested in building a career in enterprise networking, infrastructure operations, and system administration.
